

LOGISTICS

INTRODUCTION

Logistics tactics address the practical considerations involved in various oil spill support functions. Logistics functions are critical to the overall success of the spill response.

This section contains two tactics to assist spill responders in planning for spill support functions:

- The **Staging Area** tactic provides strategies for establishing a location where equipment and personnel can be received and prepared for deployment to the spill site, and where demobilized equipment returning from the field can be received and prepared for either remobilization or demobilization.
- The **Vessel Decontamination** tactic provides strategies for removing oil contamination from vessels that are exposed to oil and oily waste during spill response operations.
